

WR135G-M30

2100M Gigabit WIFI Router

WR135G is a 1200M 11AC dual-band wireless router specially designed for large-sized apartments with over 100Mbps FTTH network. The router is equipped with dual-core CPU and DDR3 memory, it enables the system to run fast and stably. With 128MB large memory, it has a larger data cache space to guarantee game acceleration and more functions. The built-in independent PA / LNA signal enhancement module and external 4 high-gain omnidirectional antennas produce strong signal penetration performance, which truly help to achieve the full coverage of dual-band WIFI in villas and large-sized apartments. WR135G is widely used in various applications such as wireless relay, LED light / WIFI timer switch, USB sharing etc. It is an ideal router for requirement of large coverage, signal penetration and smooth surfing.
